Ophthalmic Literature

VOL. IV. APRIL, 1914. NO. 4.

Edited by EDWARD JACKSON. Assisted by WILLIAM H. CRISP.

THE WAVE OF LITERATURE.

Although ophthalmic journals are supposed to be issued at regular intervals, so that approximately the same amount of literature might be expected each month, it happens that through delays of publication and postal service, double numbers and the massing of society transactions, the number of titles that come for the "Index of Ophthalmology" may one month be double the number in another. This month shows the largest number of titles yet published in any one issue of Ophthalmic Literature.

The first object of **Ophthalmic Literature** is to furnish the classified index to its readers at the earliest possible date. The routine necessary to accomplish this excludes additional pages to meet such emergency. Therefore this month other matters are crowded out; among them notices of important books, including the third volume of the American Encyclopedia of Ophthalmology, and the second edition of Beard's Ophthalmic Surgery, which will receive proper attention in our next issue.

Ophthalmic Year Book

VOLUME X.

This volume will soon be issued. It will contain over 500 pages, embracing a digest of the ophthalmic literature of the world, for the year 1913, with a bibliography of all important papers therein mentioned. Illustrated.

The following opinions of the Ophthalmic Year Book have been expressed by leading ophthalmic journals:

"Its completeness, the judicious selection and the perspicuous arrangement of the subjects are admirable. . . . Its price is nothing compared to its value to the student."—American Journal of Ophthalmology, Dec. 1911.

"It has the unqualified endorsement of all ophthalmologists who are properly familiar with it; and deserves immediate introduction to the shelves of all ophthalmologists who are yet to learn its value."—Annals of Ophthalmology, Jan. 1912.

"It would seem that the merits of this Year Book must be sufficiently apparent to every active oculist to lead him to subscribe."—Archives of Ophthalmology, March 1912.

"We have frequently before had to express our admiration of the wonderful completeness of this record of the year's work in ophthalmic science, and to marvel at the energy and work that must have gone to its completion."—Ophthalmic Review, Feb. 1912.

"For comprehensiveness the Ophthalmic Year Book has no equal in our language. It well nigh passes comprehension how any ophthalmic surgeon can afford to be without it."—The Ophthalmoscope, Apr. 1912.

The Ophthalmic Year Book will be sent postpaid on receipt of price, Five Dollars.
